Comments: It is hard to know where to begin! Please, just stop the destruction of OUR old growth forests. The only reason I can think that this practice has continued for so long, is nothing but pure greed. Mostly of course, the greed of the logging industry. The idea that so many jobs will be lost is a red herring at best. There's also been mismanagement from the BLM, etc. What short-sightedness this has been for so long. Please do everything possible to stop the destruction of what very little is left of these magnificent old growth forests and all of the wild beings they support.

It is way past time that OUR forests are protected and really protected.
