Comments: Old growth forests in Ky are a state and national treasure. They are a legacy for future generations and essential for the health of our planet. I urge you to treat these magnificent areas as such!

Toward that end:

-Immediately stop cutting old-growth in the Daniel Boone National Forest.

-Eliminate exceptions in the plan that allow forest managers discretion to convert old-growth to young forests, or to otherwise degrade or diminish forests' old-growth condition.

-Develop a plan for a network of future old-growth forests through an open, participatory, and scientifically sound process.
