Comments: We live on Rapid Creek, approximately 9 miles downstream of Pactola Reservoir. Many people live along the creek and use the water untreated. The entire City of Rapid City uses the water plus outlying areas. WE DO NOT HAVE EXTRA WATER for mining exploration and/or drilling. We do not want more chemicals in our water, and we do not want less water. Drought is a common word around here, after all, we are considered a semi-arid area. We do not want or need mining activity within the Pactola Reservoir-Rapid Creek Watershed - EVER. But twenty years is a start. Please listen to the objections and stay away from us.
