Last name: Westmoreland

Organization:

Title:

Comments: To US forest service officials,

I strongly support the measures to safeguard what group forest for multiple reasons:

-for my children and their children and their grandchildren

-for wildlife and bird preservation and conservation

-for carbon absorption to mitigate climate change

-for the lives of so many people, indigenous and local, who value the forests

-for the lives of people who live near the forests and who are impact of logging and clear cutting on their landscape and water supply

-for protection of soil and prevention of mudslides and erosions.

Please approve the measure to stop allowing cutting of old growth trees and forests.

Susan Westmoreland
