Comments: To fulfill the President's commitment, we are asking the Forest Service to update their amendment before September 19th to accomplish the following: Stop old-growth trees from going to the lumber mill; what we have left is too precious to cut. Lay the groundwork for long-term protections for mature forests, to ensure they can grow into our next generation of old-growth forests. Why this matters to me: If we lose our old growth forests, it's the beginning of the end for humans.
