Comments: Lived here for 20 years and our beautiful Black Hills and surrounding areas are already severely damaged by mining. It's despicable what has been allowed to happen here. No amount of replanting trees or other measures will return it to its once beautiful state. Enough is enough. No more mining here period! Go somewhere else and destroy someone else's natural beauty in the name a profit and dollar signs. We have had enough of it here as it is. I am 1000% opposed to adding more mining of any kind here.
