Comments: I've lived in McCall since 1979. I've seen our economy boom and bust. People come to Idaho because we have a beautiful state. My family and friends hike, float the rivers, fish, and hunt. We need to think about why people move here. We have beautiful mountains and CLEAN, CLEAR rivers and streams. They don't come to see open pit mining operations. They don't come here to float in polluted waters that fish can't thrive in. Did the last mining company "cleanup after themselves" once they got their gold? I'm also very concerned with the traffic on Hwy55. There's ALOT of cars and trucks on the road already. Now we have to worry about hazardous materials as well. I hope you require Perpetua to use double or triple hulled containers so we don't have to worry about spillage in our rivers. Please say NO to Perpetua
