Title:

Comments: I ask that you continue the trend of siding with the environment and not allow the Stibnite Mine to endanger the Salmon River. We have such a precious thing in the Salmon River, the longest free flowing river in the lower 48, and it is precariously protected by the Frank Church and the river permit lottery. Why undo all the work that has been put into preserving the river and the land that it supports by allowing the mine and the infrastructure it will bring to devastate the Salmon? Please, please reconsider.
