Comments: I request to submit the following comment regarding scoping the NEPA environmental review of HPCC Recovery Project. I am a frequent recreational user (back packing and skiing) of the Pecos Wilderness and surrounding SFNF. I would like the review to include consideration of alternatives for 1) closure and abandonment of forest roads that are prone to erosion and 2) restoration and replanting of fire breaks and fire lines. In particular, alternatives should include restoring Trail 36/Divide Trail and the surrounding forest cover north of Jicarita Peak, which apparently was obliterated by a fire line.
