Comments: I have had the privilege to offroad on the grasslands with the Cliffhangers several times over the last few years. The glass lands are a crucial area for this sport and the Cliffhangers. To make this area more defined with mapping and an off road management plan would be ideal. All Cliffhanger trails should be maintained for usage. Majority of offroad establish areas are implementing these ideas such as the Black Hills and Iron Range OHV, as well and many others across the country. I explore the glass lands more than anywhere else. From the Cliffhangers trail systems to the Maah Hey Daah. These are my favorite places to be in North Dakota. I believe that these trails need to be a dedicated Offroad established area.
