Title:

Comments: I want it to be known that I whole heartedly support the Pactola Reservoir-Rapid Creek watershed mineral withdrawal. I have three daughters and a family that reside in Rapid City and I believe we need to protect our water from contamination in any way possible. I think it is important to be aware of our actions in terms of a sustainable future. I believe it is in the best interest of our community and economy here as a whole to support this withdrawal in order to ensure a successful future. The black hills has seen some rapid growth in the past few years and in order to sustain that growth we should be doing everything we can to ensure the safety of our community members. Thank you for allowing me the opportunity to use my voice.
