Comments: i wish to be on mailing list on all developments on this project i am definiely opposed to prescribed burning. i do not believe it is right for forests. i like the way burning was handled in past, bring in planes and dump water on it. put it out as soon as you hear about it. if fires only start once in l00 years, that should do it for l00 years. the govt doesnt want to spend any money in america anymore. it prefers to tax us to death and send the tax dollars that could be used here to send to ukraine and lebanon and hundreds of other countries. i find that stupid. take care of our own country. put out the fires. the fact is burning of any kind releases cancer causing particles in the air cancer causing particles. it also causes asthma, allergies, pneumonia, strokes, etc and is very bad for senior citizens. dont burn. dont make excuses to burn put the fires out. i think these burning plans are made by employees to make extra money for fire fighting. extra pay
