Comments: I support the Pactola Mineral Withdrawal because it can protect Water quality,  Honoring Tribal treaty rights, fishing rights, and human right to clean water. We have harmed tribal communities for century by violating their treaties. These communities have been deprived of much because the treaties are not being enforced. If the treaties are to be ignored then please consider this from an equal protection lens. The US Constitution demands equal treatment for uncompensated government takings, excessive fines, and clean water. Please, consider this humanely.
