Comments: As a long time resident of the Black Hills and an avid hiker I would like to weigh in on the crucial importance of maintaining the outdoors with the wonderful trees and scenery here. I'm supporting the 20 year extension of banning mineral withdrawal from the watershed around Jenny Gulch. The quality of the water and the amount of water available for business and residential use as well as use for the military is crucial for our future as a community, and of course for the plants and animals. The mining here in the past has degraded our land and water and will continue to do so if allowed.
