Title:

Comments: The US Government has not yet paid or offered a fair price for this land. I am fortunate to care for 40 acres with creek frontage in the concerned area. With the impact that mining would have in the area, the plants that I use as medicine will be negatively impacted. Some of these plants are used within my spirituality and interaction with the Creator. No man, government, or corporation has the right to interfere with my prayer. I chose to live in harmony with the natural things around me. Mining is not natural. Mining will impact me and my children's way of spirituality which is not a right of others got do. Mining damages the natural order which I am opposed to. I ask in a humble and respectful way that no form of mining, exploratory or explicit be allowed in this area.
