Comments: I stand in full support of the Pactola Mineral Withdrawal. It is crucial to protect the water that so many communities rely on from poisonous contamination. Now more than ever it's vital to protect clean water supplies, and a 20yr protection would be an amazing start in this process. Not to mention how crucial it is to honor tribal treaty rights, lands and waters at all times as a bare minimum. Please don't let these mining companies continue to pollute and contaminate such a vital resource needed by all for survival and life ways.
