Comments: The Black Hills has been an area I have had the privilege to escape to since I was a small child. I have always had a deep connection to this area. I have many friends and family that still live there today. Maintaining the beauty and also the integrity of the land is very important to them and also myself. I am requesting you consider the importance of maintaining this land.

Please extend the 20 year protection from mining. Potect a beneficial water source for the community and also one of the most beautiful places on earth.
