Comments: As a member of the Cliffhangers Club since 2011, I have been able to enjoy off roading in the badlands. I would like to continue to enjoy the use of this land, but would like to ensure it is taken care of. I feel this could be done with required off-road permits to bring in revenue for the maintenance and development of trails. Trails could be rated and be specific to the mode of transportation, whether it be side-by-sides, ATVs, jeeps/trucks, or horse back. Each trail could be marked with appropriate signage to ensure proper equipment and use. More difficult trails could have gate keepers to deter less capable vehicles/operators from attempting and potentially damaging their vehicle or causing harm to the land.
