Title:

Comments: Anything we can do to improve habitat for game species is my preferred use of funds. As long as there are no restrictions as to public use of the area. After reviewing the proposal in its entirety, I saw no mention of use restrictions, so I completely support this project. I'm not sure if quail management is part of this project, but that would be an excellent addition to this proposal as well. In my own experience, grouse I have found in much thicker and heavier cover, so I'm not sure if both are feasible in this project. Best of Luck! I hope the project is approved and you can move forward immediately!
