Comments:

To US Forest Service:

I am opposed to more roads being developed in the grasslands. I was recently involved in the MDH marathon and was stunned by the number of roads that have been developed in that area since I was a young man horse back riding and hunting in the grasslands. There are more than enough roads now. Also I am most strongly opposed to any off road vehicles such as side by side. If they once get started you will never be able to control them.
