Title:

Comments: Please deny any mining activity in this beautiful wilderness! Any short term gain, to very few individuals and their companies is extremely shortsighted. After the mining ends, the only legacy will be poisonous slag piles, to no one's enjoyment. Instead, please take the long view and preserve these wild lands for generations to experience and enjoy. The economic benefit will last forever in our state attracting visitors far into the future. This wide ranging benefit makes complete sense, instead of benefits bestowed to only a few. Do not reward those who wish to scar nature's beautiful spaces. Please deny any and all mining activity concerned in the Stibnite Gold Project EIS #50516.
