Comments: As a member of the Badlands Conservation Alliance, I support prioritizing the protection of wildlife, suitable for wilderness areas, non-motorized trails, and inventoried roadless areas. No additional roads should be created in the Little Missouri National Grassland, motorized access should be limited, and unnecessary roads should be closed. It is alarming that in the last 25 years 475,000 suitable for wilderness acres in the LMNG may have been lost. This trend must stop.

Thank you.
