Title:

Comments: Hello, to whom it may concern as a member of the public and someone who is passionate about the environment as well as human rights I am contacting your organization to SUPPORT the Mineral withdrawal proposal in order to halt the potential damaging effects of mining operations on this important source of drinking water, that is also a beautiful ecosystem. We should honor our treaties and protect indigenous communities that would be directly impacted by mining operations that could severely damage not only human health but environmental health and safety. Please protect the water!! Humans most precious resource on this earth is drinkable water, humans cannot go without water but for 3 days water is just as much apart of us as it is apart of this great ecosystem.
