Comments: Please support the mineral withdrawal at Jenny Gulch in the Black Hills. There are many reasons to not mine in the area. I finally got back there this year to paddle board. It's one of the most stunning places in the Black Hills I've been. It seems like every year, we lose more of the natural beauty of this place and I believe it's paramount we don't lose these spaces. I also am very concerned about the impact of the mining to water throughout the Hills and the impact to the sacred land of the Lakota people.
