Comments: As a resident and town council member of Keystone, I am writing to support the Snake River Water District's project to add a storage tank to meet the fire flow standards and potential water needs in Keystone. We appreciate that this tank is slated to be located on Forest Service land. Forest Service land is sacred, but given that this is the only viable location, we support and appreciate locating this tank on Forest Service property. This is an asset and necessity for the Town of Keystone and surrounding Forest Service lands, should the unspeakable occur.

Thank you for supporting and expediting this project!
