First name: Mary

Last name: Burrows

Organization:

Title:

Comments: I am a long-time resident of the Black Hills, a parent and grandparent, and an advocate for a clean environment, especially the precious water of the Black Hills and beyond. Mineral extraction and its subsequent pollution threatens lands far flung from the Hills because waters flow from the various already polluted aquifers to wells far to the east.

Because of this, I support the total mineral withdrawal to protect the Pactola watershed and the Rapid City water supply.
