Comments: Hello, I am currently a very frequent visitor of the area above and below Pactola Reservoir. I have been hiking every day for 170 days in our amazing area. As a resident who drinks tap water and utilizes the creeks near by. I have personally seen visual evidence of the left behind after thoughts of mining in the hills and that area. Please much like many other areas of the black hills. Give it a break to recover. Water is very important especially in that area to everyone who lives below and above. Thanks
