Comments: In my comment letter 17117, I requested 1. clarification of design and engineering of the Burnt Log Road, 2. clarification of responsibilities of Valley County and Perpetua to keep the Johnson Creek road open, 3. clarification of who is responsible for improvements and maintenance of the Warm Lake Road, particularly the dangerous Landmark grade, and 4. Highway 55 congestion and upkeep.

None of these issues have been addressed. This hasty confirmation process is hazardous and expensive for Valley county residents, tourists and wildlife. The forest service must not take any action until a revised FEIS and revised DROS demonstrate full compliance with each and every law, regulation, policy, and concerns of the public for safety.
