Comments: Good Morning,

Enough is enough with LANL continuing to run and ruin our beautiful state, the Cultures and our People.

It's ironic that you are the forest service.

When I think of both of those words, I think of the service and what it is protecting.

I work in Education with the homeless SFPS students and their families and we provide services as well; hoping to improve the quality and sustainability of their lives.

How are you providing protection and sustainability of our forests and the life it holds and protects?

You are allowing the opposite.....and for what?

Stand up to LANL for a change please.

Thank you.
