Title:

Comments: I am a young man who grew up in rapid City. I frequently traverse the black hills and I love nature.

I enjoy the pactola area particularly. I love spending time out in the forest and on the lake.

Mining around the pactola area does not benefit the general population that lives here. In fact there's a good chance it will actually poison the general population. I do not support mining in the Black hills, specifically around the pactola area. I vote against mining around the pactola area.
