Comments: I fully support the mineral withdrawal to block mining. Let the mining companies go to some desolate part of the country to do that. The Black Hills is such a beautiful area, why allow them to destroy that with taking over large tracts of land, creating loud noise and dust and debris. People and animals need the beauty and serenity of wild places. We have quite an influx of people to the Hills, moving here from other places, who have visited and want what this area has to offer in the way of scenery, dark skies and quiet. Industrial mining is not a 5days a week,/8hr day operation. It's apt to be 24/7. Just say no and stick to it.
