Comments: The Black Hills are a special place. We are fortunate to be the stewards of this land for a short period of time, and we have the responsibility of maintaining its health for generations to come. Pactola and the Rapid Creek Watershed, in particular, will provide fresh, clean, and safe water to all residents of the area for years, assuming we take care of the watershed. I support this withdrawal for the well-being of the area's residents and the health of the ecological system nearby.
