Comments: I support the withdrawal of consent of the mining . There has been too much mining in this country without understanding of the effects. There is already existing data to support our next extensional threat is lack of clean water; which Ming will disturb both surface water. And ground water. Then let's talk about the forests that are already in trouble a record number of trees are not drawing the CO2 levels they have in the past. Let's solve the problems we have already not incur more .
