First name: Eleanor
Last name: Hancock
Organization:
Title:
Comments: I support the withdrawal of mining companies from the Pactola Reservoir-Rapid Creek Watershed! Environmental destruction is taking a toll on our country, and our planet. Furthermore, Native peoples need access to undisturbed land in order to preserve their culture. Clean water, wilderness areas for recreation, wildlife habitat and Indigenous culture & sovereignty must be preserved for future generations. The USDA Forest Service has a responsibility to Native tribes and to American citizens at large to protect the sacred Black Hills from toxic mining. Sincerely, Eleanor Hancock
