Title:

Comments: I support this Withdrawal of mining operations in Paha Sapa: The Black Hills.

Clean water, preservation of pristine/sacred lands, the rights of wild life to experience full lives & Natural deaths, joy, family life, follow their Creator - given FREE WILL, respect and restoration for all that lives on Earth with us. We humans are animals. To separate ourselves as "human", apart from our relatives, superior to Nature's Wisdom, is killing us all off.

Please expedite the Withdrawal proposal to the Secretary of the Department of Interior. These lands, waters, skies are for ALL spirits to share equally. All forms of life, even the rocks, mountains, molecules, atoms, space between matter resonates with the exact same vibrationally mysterious, Ringing Radiance. We must relearn how to acknowledge this fact.
