Title:

Comments: I absolutely support the withdrawal of any claims by mining and extractive industry from the Pactola Reservoir - Rapid Creek Watershed. We have already extracted far more resources than we need to live healthy and fulfilling lives. It is our responsibility to live within our means. It is our responsibility to stop the ongoing destruction of native communities and the lands that they have tended for millennia. It is time to look to them and to their traditions to learn how we can live on this planet without destroying it.

I urge you to expedite the Withdrawal proposal to the Secretary of the Department of Interior.

Thank you.
