Title:

Comments: I strongly support the Withdrawal. I feel that it is in the best interest of the environment, saving land on which Native culture has thrived and established sacred ground, and keeping up an area that is enjoyed by outdoor enthusiasts. My feelings are very significant about efforts to maintain a clean environment and clean water for people and wildlife, and saving land that, in too many cases around the country over time, has been overtaken by corporate entities just for money, no matter what should be considered safe and sacred. I know there are many people like me who want this withdrawal to happen; please listen to us and do the right thing.
