Title:

Comments: Please note that I support the Pactola Reservoir-Rapid Creek Watershed Withdrawal. These lands are sacred to people who have lived there for hundreds and hundreds of years. They are beautiful and would be enjoyed by anyone who visits. Especially, the water that runs through these lands is pure. Keep it that way. Mining toxifies water and leaves residue that continues to contaminate the water in the area for years to come. There is so little good water left in this area and wherever humans have not valued and protected water. Keep this area pristine as possible. Do not let mining occur there.
