Comments: Hello,

My name is Charlotte and I support this Withdrawal.

We are obviously experiencing extreme negative consequences from not taking care of our planet. It's imperative that we the people take all the steps we can possibly do to keep our limited water clean, and take care of the land we still have.

I volunteer at the school garden for elementary students and teach them to love our planet (including the spiders!) I try to show them how to advocate and take care of the world, while also doing it myself.

Please expedite this action. Thank you.
