Comments: In the interest of all future generations the Preservation of Natural Landscapes is of utmost importance,. By Far Outweighing any short term Economic concerns. This is even More Disturbing considering the previous incursions on Treaty Lands by similar entities and the subsequent defacement of Sacred Center of the Lakota Nations. When the Rescorces are gone the Scars Remain out living the Men Who enriched themselves by the Theft of what No One Can Own. The Lakota Nations have made it Abundantly Clear that The Black Hills Are NOT FOR SALE. This includes the minerals, water and all that are supported by this Sacred Landscape and it's Ecological Web.

Once these things are gone they are Lost to All and cannot be replaced. I Thank You for your consideration in this Matter. Seeing as I am from a state that is Developing Itself to Death, I can attest to what the Monetizing of Everything Looks Like. It's Not Pretty. This is a Tiny World but a True Gift. Please Help it Remain So.

Thanks
