Comments: Pactola Reservoir - Rapid Creek Watershed Withdrawal #63876

TO WHOM IT MAY CONCERN:

"I support this Withdrawal."

WE MUST protect all watersheds. We have a finite amount of potable water in the world, there are now 8 billion thirsty people. we must protect our watersheds from pollution. The water is dedicated for a specific purpose, not this purpose. Water is sacred and it is our responsibility as human beings to protect that which is a gift for the well-being of our people and future generations. the Black Hills are sacred and also need to be protected...they carry the message to the people from the stars and must be cared for in a good way.

Please expedite this withdrawal. I kindly Thank you for your care and vigilance of our holy sanctuaries and for the Right to have pure water. Deanna Jenné
