Title:

Comments: To whom it may concern: The Black Hills remain a sacred area for the tribes and was stolen long ago when gold was discovered and now it is threatened by toxic mining, which steals the water. When is enough, enough? Do greedy miners need one more place to spoil? Do you hold these people responsible when no one can drink the water and the toxic out put makes the children sick? Please, no more. Do not allow a mine in this sacred place.
