Comments: I support this withdrawal from Black Hills, I believe that the mining will disrupt the ecosystem of the area and have a negative impact on it. Pollution is a major issue that has been plaguing our planet for decades, and allowing mining to be done in this area will only make that issue significantly worse. Additionally, this area is very important and sacred to Lakota people, and I believe that creating a mine in the area would not only infringe upon environmental rights, but also peoples' religious freedom. I implore you to not only consider, but take action to prevent mining companies from operating here.
