Comments: I strongly support this Withdrawal & request that the Forest Service please expedite the Withdrawal proposal to the Secretary of the Department of Interior. Given the climate/biodiversity loss/extinction/pollution/deforestation and other interrelated crises, it's imperative that the Forest Service do everything in its power, to ensure responsible land stewardship, access to clean drinking water, reversing environmental damage & fostering a healing of the land, plant & animal species and ecosystems, to try to halt the current catastrophic biodiversity loss, and preserve & protect pristine, sacred lands, for the benefit of current and future generations. It is my deepest hope that the department will work in close partnership and collaboration with local indigenous peoples, who are the original and ongoing and ancestral stewards of the land. Thank you!
