Comments: Forest Supervisor,

I wish to state my support for withdrawing this area from any consideration for resource extraction. It is my general belief that preserving all that remains of this country's natural areas, those least exposed to human use and thus most biologically intact, is critical for the future as we face the unprecedented challenge of climate change.

I also speak as one who has a great fondness for the matchless beauty of this unique place. It is well past time for humans to recognize the need to leave such places be, as time moves them along in their own evolutionary direction.

Finally, I urge you to expedite this proposal to the Secretary of the Department of the Interior

Thank you for your consideration
