Title:
Comments: I fully support this withdrawal. There are so few spaces in nature in this country that aren't being mined or turned into residential or business areas or otherwise being destroyed, I think that making sure this area stays more or less clean from such developments is important for that reason. It is also important to me that the area and especially the water stay clean and unpolluted as much as they can, since there are Indigenous communities in the area that rely on that water and that land for their livelihood and general health and wellbeing.
