Comments: I support this Withdrawal -Pactola Reservoir - Rapid Creek Watershed Withdrawal #63876.

The World is dying . Plastics are everywhere. Mining waste is everywhere. It seems as though we hate our Mother Earth, the very Earth who gave us everything we needed to survive. Fresh air and fresh water has become a myth. The land here is sacred from immemorial.

There should be the greatest haste possible to expedite this withdrawal. Mitakuye oyasin (All My Relations)
