Comments: I support requiring Withdrawal

I am writing in support of preserving the area at the headlands of the Rapid Creek Watershed. I think that it is damaging to our environment to allow mining in a watershed area because of the toxic water pollution it causes. Water is a precious natural resource and everything should be done to make sure that it is protected. I sincerely believe that it is our responsibly to preserve as much wilderness area and our environment as possible for our children and generations to come. I respectfully request the US Forest Service preserve this pristine headland wilderness area by expediting the Withdrawal proposal to the Secretary of the Department of Interior. Thank you.
