Comments: I support this Withdrawal.

Evert time an enviornment is destroyed, years later it is mourned. Years from now the resources that could have been gleamed from a portion of land won't matter like the things that we're destroyed in the process of harvesting them.

There is an entire world out there, and losing this site as an area to mine in would be miniscule in comparison to all the other places that are readily and ethically acessable.

Please expedite the Withdrawal proposal to the Secretary of the Department of Interior.
