Title:

Comments: I support this Withdrawal. We all need clean water in order to live. We need to take care of our trees, as they take care of us. The animals need a place to be. I believe the systems that support life are in decline. As a society we must begin to accept responsibility for the harm we cause by engaging and benefiting from activities such as mining. As a society we must find other, more equitable ways to provide ourselves with what we need to live. Let us work together to discover those other more responsible, and dare I say more restorative ways. Please expedite the Withdrawal proposal to the Secretary of the Department of Interior. Thank You for your consideration.
